Aisha Rahman

Machine Learning Engineer | jobs@example.com | +1 555 0100 | Example City

Summary

Machine learning engineer who takes models from research into reliable, monitored production services.

Experience

Machine Learning Engineer, Atlas Mobility (2022 - present)

- Deployed a ranking model behind a FastAPI service with p95 latency under 40 ms.
- Built the training pipeline in Airflow with dataset and model versioning in MLflow.
- Set up drift monitoring on input features and prediction distributions with automated retraining alerts.

Data Scientist, Quanta Insurance (2020 - 2022)

- Developed a fraud detection model in PyTorch, improving precision at fixed recall by 12%.
- Converted notebook experiments into tested Python packages.

Skills

Python, PyTorch, scikit-learn, MLflow, Airflow, FastAPI, Docker, Kubernetes, feature stores, model monitoring, SQL, unit testing of ML code

Education

MSc Machine Learning, Imperial College London (2019); BSc Computer Science (2017)

Projects and other

Maintainer of a small open-source library for model evaluation metrics.
