Grace Mensah

Cloud Architect | jobs@example.com | +1 555 0100 | Example City

Summary

Cloud architect with ten years of experience designing and migrating large platforms to AWS for regulated industries.

Experience

Principal Cloud Architect, Summit Insurance Group (2021 - present)

- Lead the architecture of a multi-account AWS landing zone for 12 business units.
- Designed the migration of a core policy system to AWS in three phases with parallel running and clear cut-over criteria.
- Set standards for networking, identity and cost allocation that are used across 20 teams.

Solutions Architect, Nimbus Systems (2015 - 2021)

- Designed hybrid connectivity between on-premises data centres and AWS using Direct Connect.
- Led cost optimisation work that cut annual cloud spend by about 25% through rightsizing and reserved capacity.

Skills

AWS architecture, Azure fundamentals, Terraform, networking (VPC, transit gateway, BGP), IAM and security by design, disaster recovery design, cost management (FinOps), stakeholder management, mentoring

Education

MSc Computer Science, University of Nairobi (2014); AWS Certified Solutions Architect (Professional)

Projects and other

Co-author of an internal reference architecture for regulated workloads.
